Using Creativity and Innovation to provide Exhibits, Marketing Support and Design

WEBSITE DESIGN

Flash Animations

Designs on Display can create Flash presentations which range from simple animation sequences, to entire Flash-based interactive sites. We can develop movies, music, games, and integrate it all into basic HTML programming.

Optimized Graphics

Graphics are our specialty! We optimize graphics so that they are easy and fast for your site visitors to download and view.

Integrated Videos

Whether you would like us to create a video just for you, or if you would like us to integrate existing video that you may already have, we can give you options to maximize the experience for your web viewers so that you can get the impact you deserve.

Database/Data Driven Sites

Your site is a powerful, dynamic and custom tool which can collect as much information as it gives. Let us meet with you and discuss how we can create a site which meets all of your specific needs.

We can help:

- Get your URL (domain name)
- Host your site
- Give you e-mail accounts
- Create your website
- Track visitors
- Everything you'll want online!

Interactive 3D Environments

Like the Tunnel of Oppression project which we created for Wright State University's Counseling and Wellness Services. Similar to a modern "real player" game, the visitor has a completely interactive first hand experience as they explore the 3D virtual museum environment. Multimedia experiences are the focus of the site and are integrated in a powerful and intuitive way.

Designs on Display offers you the complete advertising cycle from start to finish!
